

PampaR v9 - Resultados de Benchmark

 **Fecha:**

13 de Enero de 2026

 **Modelo:**

PampaR v9 Territorial (14M parámetros)

 **Checkpoint:**

pampar_fragmentado_best.pt (Fragmento 3, Epoch 9)

 **Hardware:**

NVIDIA GTX 1650 4GB VRAM

Resumen de Entrenamiento

35M

TOKENS

3.93

LOSS FINAL

50.7

PPL FINAL

-60.2%

MEJORA

FRAGMENTO	TOKENS	LOSS FINAL	PPL FINAL	MEJORA VS INICIAL
1	10M	4.85	127.5	Línea base
2	20M	4.22	68.1	-46.6%
3	35M	3.93	50.7	-60.2%

Tokens totales vistos: 195M (9 epochs × ~21.7M tokens/epoch)

Comparación con Otros Modelos (WikiText-103)

MODELO	PARÁMETROS	PPL	AÑO	NOTAS
LSTM (Merity et al.)	24M	69.1	2018	AWD-LSTM
Transformer-XL (Small)	24M	54.5	2019	Memoria recurrente

MODELO	PARÁMETROS	PPL	AÑO	NOTAS
PampaR v9	14M	50.7	2026	Arquitectura territorial
GPT-2 Small	125M	35.1	2019	Transformer estándar
GPT-2 Medium	355M	26.4	2019	Transformer estándar
Transformer-XL (Large)	257M	18.3	2019	Memoria recurrente

Análisis Comparativo

- ✓ **PampaR supera a LSTM** con 42% menos parámetros (14M vs 24M)
- ✓ **PampaR supera a Transformer-XL Small** con 42% menos parámetros
- ✓ **Eficiencia:** 50.7 PPL con solo 14M params es competitivo

Pruebas de Generación de Texto

Test 1: Continuación Narrativa

Prompt: "The city of"

TEMP	GENERACIÓN
0.7	The city of M-70 was planned to develop the ship's location and its construction of a new site of a city's location for the site was opened on 12 May 2010. The city's main building was originally planned to be made by the museum...
1.0	The city of Believing insists the complex needs of international science, made during World War II and a rock studio for the more popular years of the world...

Test 2: Histórico

Prompt: "In the year 1900 ,"

TEMP	GENERACIÓN
0.7	In the year 1900, he had an 19-year-old in the 1900s. The NLLL was designed by the new design of the NFL, and has been the first largest-selling game in the world...
1.0	In the year 1900, the winner of the winner of the 2009 Massacre Left and Tintas Vienna have won against Massacre's first silver defeats...

Test 3: Científico

Prompt: "The study of"

TEMP	GENERACIÓN
0.7	The study of the New England team, in which he was with the club, was a member of the football club in the United States...
1.0	The study of the National Research Service Society occurred in Los Angeles. By 1954 the provision he converted into its current industry...

Test 4: Secuencias

Prompt: "First , second , third ,"

TEMP	GENERACIÓN
0.7	First, second, third, and fourth, in the fourth and third overall, scoring in the third of the final. The second time was 3.15...
1.0	First, second, third, hit and ten-day runs under a 61 5 RBI amendment (2506)...

Perplejidad por Tipo de Oración

ORACIÓN	PPL	ANÁLISIS
"The history of the world is the history of humanity."	16.7	✓ Excelente - frase común
"In mathematics, a function is a relation between a set of inputs and outputs."	22.3	✓ Muy bueno - técnico pero común
"The sun rises in the east and sets in the west."	65.0	⚠ Aceptable - menos común en corpus
"She walked through the forest, listening to the birds singing."	61.6	⚠ Aceptable - narrativo
"The experiment was conducted in a controlled environment."	190.7	✗ Alto - vocabulario científico específico

Promedio PPL en oraciones de test: ~71.3

Test de Diversidad

Prompt: "The scientist discovered that"

Generaciones: 5 continuaciones diferentes

1. ...Tonchler continued to hiberate art and socialism at the time in his novel...
2. ...his gathered marriage to Holidwood and he failed...
3. ...Lucas-Lanzzhezky would later later proposed adding that the combinations...
4. ...the ROJ is even better known, since it is not yet to belong to the University of California...
5. ...Birthfire could be supported by having been scattered to create a 30-mile-round portalone...

Ratio de diversidad (tokens únicos/total): 68.21%

- >60% = Buena diversidad
- 40-60% = Diversidad moderada
- <40% = Baja diversidad (repetitivo)

Arquitectura vs Resultados

Comparación de Eficiencia (PPL/Millón de Parámetros)

MODELO	PARÁMETROS	PPL	PPL/M PARAMS	EFICIENCIA
LSTM (Merity)	24M	69.1	2.88	Base
Transformer-XL	24M	54.5	2.27	1.27x
PampaR v9	14M	50.7	3.62	0.80x
GPT-2 Small	125M	35.1	0.28	10.3x

Nota: Menor PPL/M Params = más eficiente. PampaR logra buen PPL con muy pocos parámetros, pero GPT-2 es más eficiente a escala.

Conclusiones

Fortalezas

- ✓ **Eficiencia de parámetros:** 50.7 PPL con solo 14M params
- ✓ **Coherencia gramatical:** Genera texto fluido y estructurado
- ✓ **Diversidad:** 68% de tokens únicos indica buena variabilidad
- ✓ **Velocidad:** ~2079 tokens/segundo en GTX 1650

Áreas de Mejora

- ✓ **Vocabulario técnico:** PPL alto en oraciones científicas específicas
- ✓ **Coherencia semántica:** A veces genera combinaciones sin sentido (ej: "Believing insists")
- ✓ **Contexto largo:** Limitado a 256 tokens de contexto

Próximos Pasos

- ✓ Completar Fragmento 4 (50M tokens) → PPL esperado ~45
- ✓ Completar Fragmento 5 (75M tokens) → PPL esperado ~40
- ✓ Completar Fragmento 6 (100M tokens) → PPL esperado ~35-38
- ✓ Evaluar en benchmarks downstream (LAMBADA, HellaSwag)

Configuración del Test

```
# Modelo model = PampaR v9 (14,069,410 parámetros) checkpoint =  
"checkpoints/pampar_fragmentado_best.pt" device = cuda (GTX 1650) # Generación max_tokens =  
30-60 temperature = [0.7, 1.0] top_p = 0.9 # Tokenizer tokenizer = SentencePiece BPE (8000  
tokens)
```
